DIAZ PLACES BLAME

SAYS RECENT RIOTS IN MEXICO ARE POLITICAL DOINGS OF FRANCISCO MADERO.

Venerable President Declares That Mexican People Love Peace and Understand Its Benefits and Will Not Accept Any Revolution.

New York.—President Diaz of Mexico has addressed the following telegram to the editor of the New York American, published here Sunday morning:

"The recent riots in certain portions of Mexico are the political doing of Mr. Francisco I. Madero. According to the proclamations published, upon throwing himself into a revolution, his object was to obtain the presidency by force, since he was unable to do so by the votes of fellow citizens.

"This political movement will not extend, since hitherto it has limited itself to riots in Puebla, Gomez Palacio, Paral and Ciudad Guerrero. In all these places they have been repressed by the police and the federal forces. The rest of the republic has remained completely tranquil.

"The Mexican people love peace and understand its benefits and will not accept any revolution. Further, the business men understand their interests would be in danger in the hands of persons who profess Socialism and carry on an anarchistic propaganda.

"No danger exists here either for the natives or for the foreigners, but it is very distressing that the press should publish sensational and exaggerated news, which tends to cause alarm in the money markets and to do damage to business.

"It cannot be said that there have been serious disturbances, for even in places where there have been riots, to which I have referred, order was re-established a few hours later and everyone is attending to his affairs, with no more excitement than that created by a sensational newspaper. On the other hand, the government is supported by public opinion and a well disciplined army."

ICEBERGS DESTROY CABINS BRAZILIAN REBELS VICTORIOUS

Phenomenon of Nature Swells River Ten Feet in Four Hours, Miners' Homes Being Swept Away.

Cordova, Alaska.—A disastrous flood, caused by the loosening of the waters of an internal lake in Bering glacier, swept the Bering river valley Thursday, devastating a large section of the country southwest of the great ice field. Many miners' cabins were swept away and grave fears are entertained for the lives of the occupants.

Icebergs of gigantic size were torn loose from the glacier and dumped into the river. Swept before the huge rush of waters which caused the Bering river to rise ten feet in four hours, the great masses of ice carried everything before them. Cabins near the river floated out in the water and were then ground to pieces by the ice.

The roar of the flood and the grinding and crashing of the icebergs could be heard six miles away.

Relief parties have been sent from Katalla to take aid to the stricken miners to ascertain if there has been much loss of life.

Government Pardons Murderers of Officers of Warships and Mutineers Surrender Captured Vessels.

Rio Janeiro.—The ships of the Brazilian fleet which have been in the hands of mutinous sailors since November 22 were surrendered to the government at 7 o'clock Saturday evening. This action, followed by the granting of the mutineers' demands by the government, included amnesty to all concerned in the revolt, higher pay and less work for the sailors and the adjustment of certain minor grievances.

The warships in the hands of the mutineers included the Minas Geraes, the San Paulo and the Bahia, the Rio Grande, Du Sul and the Deodoro. After the announcement of the surrender they proceeded out into the bay and re-entered the harbor at 1:30 o'clock, no longer flying the red flag.

Jean Candido, the leader of the mutineers, in company with forty other sailors, abandoned the Minas Geraes some time Friday and the minister of marine dispatched an officer to board the battleship and ascertain whether it was the intention to deliver over the vessel.

About the same time it was rumored that the officers who had been named to take command of the warships after their surrender would decline to do so, fearing the fate of Captain Neves, the former commander of the Minas Geraes, and several other officers, who were killed by the sailors when they offered resistance the night of the outbreak. The rumor caused considerable alarm, but proved to be without foundation.
